## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Hui (U.S. 6,589,267).

Hui discloses the claimed invention in figures 8-11, a pressure source (234) for supplying a pressure to pressurize a pressure cuff (208); a pressure port (248) allowing pressure into said pressure cuff (208); a source valve (248) interposed between said pressure source (234) and said pressure port (248); an occlusion sensing means for detecting blood flow past a pressure cuff (208); and a processor (202) instructs said source valve (248) to increase the pressure in the pressure cuff (208) when the occlusion sensing detects blood flow past the pressure cuff (208).

### ***Conclusion***

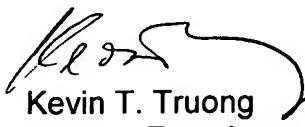

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jacobs (U.S. 5,968,073) discloses a device for applying pressure to a portion of a body.
